# What is Morepress?

---

more (English) - *in greater quantity, amount, measure, degree, or number*

more (Croatian) - *sea; a sea of books*

press - *printed publications collectively, especially newspapers and periodicals.*

- a branch of publishing activities of the University of Zadar that is focused on innovative creation and dissemination of digital scholarly, teaching, and professional publications in the open access of university departments and scientific research centres.
- 8 active, 2 external and 1 inactive journal

# Open Journal System

---

- free and open source
- journal management and publishing system
- developed by the Public Knowledge Project through its federally funded efforts to expand and improve access to research
- supports one or multiple journals on one system instance
- installed and controlled locally - you are completely in control

# Features out of the box

---

- Comprehensive data logging
  - All actions done on registered user's side
- A very detailed and powerful publishing process
- E-mail notification system - eliminating the “human” factor
- A basic search system
- A powerful PHP API - when it works
- Metadata support
- Import/export support
- Integrated DOI and Crossref support
- A very basic design (OJS 2)

# Features we needed

---

- Advanced search system
  - Apache Solr
- Modern and responsive web design
  - Custom
- Advanced visitors statistics and log
  - Piwik
- A backup system - code and database
  - Custom, using automated weekly and daily backups
- Expand the API
  - Expose more data at certain levels
- Student volunteers!
  - Quick importing the existing journal issues
- A testing site
  - Cloud server on SRCE - Zagreb University Computing Center

# Default OJS 2 design

### Journals@UIC

Journals@UIC is a project of the UIC University Library to make journals available openly to the scholarly community worldwide. It also aims to assist UIC faculty and others with the management and editorial work associated with the journals they edit.

#### Behavior and Social Issues

Affiliated with Behaviorists for Social Responsibility, *Behavior and Social Issues* is a peer-reviewed, interdisciplinary scientific journal which serves as a primary scholarly outlet for articles that advance the analysis of human social behavior, particularly with regard to understanding and influencing significant social problems. The journal is particularly interested in publishing work related to issues with social justice, human rights, and sustainability implications, but all serious social issues are of interest. Articles considered for publication should be grounded in behavior analytic and behavioral systems science. (Before submitting, please go to "About" on the menu above to review the Focus and Scope of the journal.)

Predecessor (Legacy) Journals:

[Behaviorists for Social Action Journal \(1978-1985\)](#)

[Behavior Analysis and Social Action \(1987-1989\)](#)

#### First Monday

*First Monday* is one of the first openly accessible, peer-reviewed journals solely devoted to research about the Internet. *First Monday* has published 1,645 papers in 250 issues, written by 2,289 different authors, over the past 20 years.

[VIEW JOURNAL](#) | [CURRENT ISSUE](#) | [REGISTER](#)

#### Journal of Biocommunication

The *Journal of Biocommunication (JBC)* is a publicly accessible, peer-reviewed publication of visual communication in the life sciences. The *JBC's* content describes proven or experimental procedures in medical and scientific illustration, medical and natural science photography, digital imaging, data visualization, animation, game design, instructional design, and other communication modalities.

#### Journal of Biomedical Discovery and Collaboration

What is Journal of Biomedical Discovery and Collaboration? Journal of Biomedical Discovery and Collaboration is an Open Access, peer-reviewed online journal that will encompass all aspects of scientific information management and studies of scientific practice, with a particular emphasis on biomedical laboratory investigations. Currently, many scattered disciplines study aspects of scientific practice, including informatics, computer science, sociology, cognitive psychology, scientometrics, rhetoric, and history and philosophy of science. The journal will connect these disparate perspectives with each other, and with contemporary scientific practice.

#### Letras Femeninas. A Journal of Women and Gender Studies in Hispanic Literatures and Cultures

[VIEW JOURNAL](#) | [CURRENT ISSUE](#) | [REGISTER](#)

#### Online Journal of Public Health Informatics

Interest in informatics as a specialty in the health sciences disciplines reflects the central role that information collection, analysis, and utilization now play in the healthcare sector. New public health threats such as bioterrorism and flu pandemics will demand an improved infrastructure for disseminating information about best practices. The Online Journal of Public Health Informatics (OJPHI) strives to satisfy the growing need for a public health informatics knowledge portal by practitioners, researchers, educators, and policy makers. It is a quarterly open access, open source, peer-reviewed journal.

# Problems we've encountered

---

- Multilingual journals
- Single journal vs. multiple journals
- Required fields
- Cumbersome UI translation
- Difficulty when editing existing articles
- Unnecessary complications (e.g. masthead)

# Current workflow

---

- Journals take in and review articles via email
- Articles are gathered in issues
- Titles, abstracts and authors available on Morepress before print
- DOI assigned
- Print and online PDFs available the same day

# Ideal workflow

---

- Submissions and reviews are handled via Morepress
  - Needs the willpower of: journal managers, editors, authors, reviewers, copyeditor, etc.
- As submissions are accepted, they are assigned a DOI
- HTML (!) and PDF released on a per-article basis
  - Getting the visitors - a new challenge
- Once there is an ideal number of articles, the current issue is closed and printed

# Editors' experiences

---

- Delighted, excited and optimistic
- Willing to learn
- Willing to explore
- Especially thrilled with automated processes
- A little less thrilled with the complicated back-end
- Providing great input

# The people behind it

---

- The Overseer: asst. prof. Franjo Pehar, Ph.D.
- The Drill Sergeant: Tomislav Jakopec, Ph.D.
- Me: Jakov M. Vežić, a lowly intern
- The Three Wise (Wo)men:
  - Josipa Selthofer, Ph.D. (The Design Expert)
  - asst. prof. Krešimir Zauder, Ph.D. (The Code Expert)
  - asst. prof. Jadranka Stojanovski, Ph.D. (The Publishing Expert)
- The Archangels: Lucija Žilić, Domagoj Zafranović, Sara Anzulović, Kristian Burčul, Martina Vladislavljević, Damir Selimović
- The Excavators: Ella Crnić, Sandro Slamar, Marijan Martinović, Lucija Piršljin, Lucija Kraljev
- And many more!

# Questions? Suggestions?
